OBJECTIVE

Java Backend Developer with hands-on experience in designing scalable microservices using Spring Boot, Spring Security, and JPA. Skilled in building secure RESTful APIs with JWT authentication and optimizing database performance using MySQL. Experienced in implementing Redis caching and Kafka-based event-driven architecture to enhance system performance and reliability. Proficient in Docker-based deployments, API documentation (Swagger), and clean architecture principles with DTO mapping (Model Mapper). Seeking to contribute to high-performance backend systems in a growth-oriented organization.

EDUCATION

Bachelor of Engineering in Computer Science

CGPA: 8.65

2021 - 2024

Savitribai Phule Pune University, Pune

SKILLS

Programming Language	:	Java (Core Java, Java EE), C++, Python.
Web Development	:	HTML5, CSS3, JavaScript (ES6+), React JS
Framework and Libraries	:	Spring Boot, Spring Security (JWT), Hibernate/JPA, REST APIs
Cloud	:	AWS (EC2, S3, IAM, Networking, Security), Docker (Containerization)
Databases and Tools	:	MySQL, JDBC, Git, GitHub, Postman, Junit, Maven, Eclipse, VS Code.

WORK EXPERIENCE

Software Engineer

Apr 2025 – Present

BridgeLabz Pvt Ltd

Mumbai, Maharashtra.

- Engineered and deployed microservices using Spring Boot, improving modularity and reducing service downtime.
- Implemented CI/CD pipelines (Docker), reducing release cycles from weekly to daily deployments.
- Collaborated with cross-functional teams to deliver scalable backend features, improving deployment efficiency
- Optimized MySQL queries using indexing, reducing API response time by 70% (800ms → 250ms).
- Improved application performance by integrating caching strategies and optimizing database interactions.

PROJECTS

E-Commerce Web Application | Spring Boot, Spring Security, MySQL, Redis, Kafka

Github

- Developed an e-commerce platform using Spring Boot, enabling efficient management of users, products, and orders.
- Designed and secured RESTful APIs with JWT authentication and role-based access control (RBAC), ensuring robust authorization and data protection.
- Implemented Redis caching and integrated Kafka-based event-driven architecture for real-time order processing and inventory updates, reducing API response time by 40% and improving system reliability by 30%.
- Enabled monitoring and API testing using Spring Boot Actuator and Swagger, reducing debugging and integration time by 25%.

LMS: Online Learning Management System | Spring Boot, Thymeleaf, REST APIs, MySQL

Github

- Developed a full-stack Learning Management System (LMS) supporting course creation, lecture delivery, and user management.
- Architected and implemented secure RBAC authorization for admin, teacher, and student roles, managing 1000+ users efficiently.
- Improved user engagement by 20% through real-time lecture and course content management features.

CERTIFICATIONS & ACHIEVEMENTS

- Solved 300+ coding problems on platforms such as LeetCode and CodeForces - [Link](#)
- AWS Cloud Practitioner Certified - [Link](#)
- Java Full-Stack Certification - [Link](#)
- Web Development - [Link](#)
