OBJECTIVE

Java Backend Developer with 1.6+ years of experience designing and developing scalable microservices using Java, Spring Boot, Spring Security, and MySQL. Experienced in building secure REST APIs, implementing JWT authentication, deploying containerized applications on AWS using Docker, and working with CI/CD pipelines. Passionate about building high-performance backend systems and solving complex engineering problems.

EDUCATION

Bachelor of Engineering in Computer Science
Savitribai Phule Pune University, Pune

CGPA: 8.65

2021 - 2024

SKILLS

Languages	:	Java, SQL, Python (Basic).
Framework & Libraries	:	Spring Boot, Spring Security (JWT), Hibernate/JPA, REST APIs.
Microservices	:	Eureka, API Gateway, OpenFeign, Config Server.
Cloud & DevOps	:	AWS (EC2, S3, IAM, CloudWatch), Docker (Containerization), Jenkins.
Databases and Tools	:	MySQL, Redis, JDBC, Jira, Postman, Git, GitHub, Maven.

WORK EXPERIENCE

Software Engineer

Apr 2025 – Present

BridgeLabz Pvt Ltd

Mumbai, Maharashtra.

- Designed and developed 8+ Spring Boot microservices for an enterprise Learning Management System supporting authentication, courses, lessons, enrollments, assessments, and user management.
- Implemented JWT authentication and role-based authorization reducing unauthorized endpoint access across 50+ secured REST APIs.
- Containerized all backend services using Docker and deployed on AWS EC2 through CI/CD pipeline, reducing deployment time from hours to minutes.
- Collaborated with cross-functional teams to design, develop and deliver scalable backend features.

PROJECTS

LMS: Online Learning Management System | Spring Boot, Microservices, REST APIs, MySQL, Docker, AWS

- Developed a Learning Management System (LMS) with core modules for course management, lecture delivery, and user administration, supporting role-based access for Admin, Instructor, and Student users.
- Designed a microservices-based architecture with Eureka Service Registry and API Gateway, enabling independent deployment and improved scalability.
- Containerized the application using Docker and deployed on AWS EC2, improving deployment consistency and simplifying application management.
- Built secure REST APIs with Spring Security (JWT) for course and lecture management, ensuring secure and efficient data access.

E-Commerce Web Application (Internship Project) | Java, Spring Boot, JWT, MySQL, Redis, Kafka Github

- Developed an e-commerce platform using Spring Boot for managing users, products, and orders.
- Designed and secured REST APIs using Spring Security (JWT) and Role-Based Access Control (RBAC).
- Implemented Redis caching and integrated Kafka for event-driven order processing and inventory updates.
- Enabled application monitoring with Spring Boot Actuator and documented APIs using Swagger, improving API testing and debugging efficiency.

CERTIFICATIONS & ACHIEVEMENTS

- Solved 450+ DSA problems across LeetCode and CodeForces - [Link](#)
- AWS Cloud Practitioner Certified - [Link](#)
- Java Full-Stack Certification - [Link](#)
- Web Development - [Link](#)
